

AVAIRA®

Two-Week Silicone Hydrogel Contact Lenses

TRY A NATURALLY
WETTABLE,
EXCEPTIONALLY
COMFORTABLE
TWO-WEEK
SILICONE HYDROGEL.

AVAIRA: FROM COOPERVISION.

Avaira contact lenses offer you and your patients the kind of premium performance you've been looking for in a two-week silicone hydrogel. Beyond a remarkably high level of wearing comfort, Avaira also offers:

NATURAL WETTABILITY: Avaira stays moist without surface treatments, additives, or wetting agents, aiding comfort and minimizing deposits

LOW MODULUS: Avaira features a lens material that's 30% softer than comparable premium two-week silicone hydrogel lenses for greater comfort*

HIGH OXYGEN TRANSMISSIBILITY: Offers more than adequate oxygen for daily wear, helping maintain healthy corneal physiology

ABERRATION-NEUTRALIZING SYSTEM: Unique aspheric optics enhance vision by minimizing spherical aberrations inherent in both the lens and the human eye

ADVANCED DESIGN: Avaira utilizes an optimized back surface and rounded edge design for easy fitting and better comfort

*Compared to modulus of 0.72MPa for Vistakon Acuvue® Oasys™.
