

Cracking The Code: The Myths, Mysteries & Essentials Of Medical Coding & Compliance

John Rumpakis, OD, MBA

Seminar Abstract

Through an innovative approach, this course will present actual clinical cases and provide specific coding, billing and compliance tools to help the attendee maximize their revenue while maintaining compliance to avoid costly audit situations.

You will learn how to both clinically and financially manage the top clinical medical presentations most O.D.'s encounter on a daily basis.

Through clinical case examples, learn to provide the care you were trained to and capture every dollar you are entitled to by understanding, the new Medicare rules & regulations, the “In’s & Outs” of third party coding, billing, reimbursement issues, and the true profitability of providing medical eye care to your patients.

This lecture will include:

- 1) Definition and application of Medical Necessity
- 2) Definition and application of Chief Complaint
- 3) The Medical Record & It's Role In Medical Coding
- 4) The Resource Based Relative Value System (RBRVS)
 - i. Relative Value Units
 - ii. Geographic Practice Cost Index
- 5) The Routine Eye Examination
 - i. The "S" Codes and their role in today's optometric practice
 - ii. Various "S" Code scenarios and the coding implications
- 6) The Ophthalmic Office Visit Codes
 - i. Coding Guidelines – 920XX codes
 - ii. Scoring The 920XX exam

7) The Evaluation & Management Office Visit Codes

- i. Coding Guidelines – 992XX codes
 - a. 1995 E/M Guidelines
 - b. 1997 E/M Guidelines
- ii. Scoring The 992XX exam

8) How To Translate The Exam Performed Into Coding Language

9) Keeping Your Medical Record Audit Proof

10) Application of Medical Coding & Compliance Standards Through Clinical Cases

- i. Ocular Allergy
- ii. Anterior Segment Infection/Inflammation
- iii. Corneal Abrasion
